LET'S TAKE THE A-TRAIN
How Satellite Data Help the Climate Debate
BY
Dr. Samuel Stansfield

The Burrell Observatory is proud to host an open house program on Friday March 18, 2016 at 7:30 PM. Dr. Sam Stansfield will present a lecture entitled "LET'S TAKE THE A-TRAIN: How Satellite Data Help the Climate Debate" in the "Center for Innovation and Growth" (CIG). The Afternoon Train, or 'A-Train', for short, is a constellation of satellites that travel one behind the other, along the same track, as they orbit Earth. Each monitors specific aspects of Earth's climate. Satellites that fly in close proximity to each other in a carefully planned formation allows for synergy between the missions.

After the lecture the Burrell Observatory will be open for viewing, weather permitting.

This is a free lecture and no reservations are required. The CIG is located the East side of Front Street, North of Bagley Road at 340 Front Street. Parking is available next to and behind CIG and adjacent to the Observatory off of Fifth Avenue West. For questions, contact the Observatory Director at gkader@bw.edu or the Department of Physics and Astronomy at 440-826-2312.
